Cancel

Function	Description
Only number	Here you can enter the 7-digit club number, for example, 0499001 (Country code + DGV number)
Only type	Filter specific Card types based on your needs (for example, 1 for members, 2 for guests). You can also enter more card types, separated by commas.
Only text	Here you can filter based on the information text.
Only access	Filter based on the cards' permission identification. More details about the permissions can be found under the Automats overview section.
Only valid	filter based on the expiration date: for example, you can enter 01.01.11 (for one day) or 01.01.11-31.12.11 (for a time period).
Usage	This function filters based on the last usage date. For example, you can enter 01.01.11 (for one day) or 01.01.11-31.12.11 (for a time period).
Only value	Filter based on the monetary value that is currently on the card.

<b>Function</b>	<b>Description</b>
<b>Print allocation of points</b>	Check this box to print the current points value.
<b>Active</b>	Select the desired option.
<b>Order</b>	Select the desired order.
<b>Calculate card activities from....to...</b>	If this option is selected, PC CADDIE prints an overview of the cards top-ups and charges.
<b>Only differences</b>	Print only the cards with a difference between top-up and charges.
<b>Offset on this date</b>	Here you can set an offset to a specific date.
<b>Article selection</b>	Set the filter for a specific article.
