

Automate card types

PC CADDIE can automatically assign types of cards depending on the persons groups; you can activate the corresponding menu entry using these special parameters:

CARD_TYPEAUTO	Creates a menu item for defining the automatic assignment in the „Card-System“ menu
CARD_TYPEAUTOCHECK	Checks the automatic assignment of card types for every action

Abbruch

In addition, you can set expiration dates, free points and lines of credit during the automatic assignment. Prices are defined as usually using the pricing schemes. Please make a **fast back-up** before hand. This function sets the **selected card type** for **ALL the persons** that are included in the filter.
