

Compare all member handicaps from golf.at

World Handicap System

According to information from the ÖGV, with the introduction of the WHS it will no longer be possible to transfer the „master sheets“ completely to the PC CADDIE club management software. Only one line with the current handicap will be supplied.

In Austria, the master sheets are managed at golf.at.

With this function under **Handicaps/Compare all member handicaps from golf.at** the current handicaps can be completely transferred to PC CADDIE from time to time. This function primarily serves the following purposes:

- Analyses with PC CADDIE, such as the [Player of the year](#) (no longer possible with WHS)
- Print master sheet for the member (no longer possible with WHS)
- Print out current handicap of members, e.g. lists of persons (also possible with WHS)

The same function is also available in the [master sheet of the individual customer](#).
