

Online Bookings & Channel Manager Hotel

PC CADDIE supports an interface to the Hotel-Spider channel manager.

The well-known online platforms and portals can be connected via Hotel-Spider.

Via this interface, PC CADDIE sends the availabilities of the different room categories to Hotel-Spider. New online bookings are automatically created in PC CADDIE.

It is also possible to transfer price information from PC CADDIE to Hotel-Spider.

To do this, the „Link“ field with the product IDs of Hotel-Spider must be entered in the PC CADDIE hotel settings.
