IOTee interface to ClubCarts

There is an online booking and activation system for activating carts from the manufacturer ClubCart. PC CADDIE provides an interface so that the cart resources that are managed in the PC CADDIE timetable do not have to be managed in parallel. The interface is used to book the carts in the PC CADDIE timetable (locally or online) and the activation is triggered via the IOTee interface. If you have any questions, please contact our support team.
