

Results notification

Information about the intranet. Where are the results automatically sent to??

Find out => [here](#)

The function **Competitions/Multiple Tournaments, Golf Weeks/Print.../Results Notification** is in general identical with the function **Competitions/Print.../Results Notification**. Both functions are required only in exceptional cases, usually only for players from countries which are not connected to the intranet.

In addition to the second option, the first one allows you to print the results notifications simultaneously for more tournaments, while the print functionality accessible directly under the menu Competition is used only for a tournament at a time:

The screenshot shows a software dialog box titled "Results notification". It features a "Competitions" section with a "Select competitions (F2)" button and an empty list box. Below this is the "Group of persons" section, which includes a dropdown menu currently showing "All persons" and a "Define" button. A checked checkbox labeled "with foreign home-club" is also present. The "Only this club:" section has an empty text input field and two small icons. Further down, there are two checked checkboxes for "Print header" and "Print sender". A text area for "Information about the results:" contains the message: "Dear Ladies and Gentlemen, Your club's members obtained the following results on our course (the results within brackets are not handicap effective!);". On the right side of the dialog, there are two buttons: "Print (F8)" and "Quit".

Use this dialog to set which **Competitions** and which **Group of persons** are to be considered. Furthermore, you can alter the text from the **Information about the results** and decide whether the header and the sender should also be printed. Start the printing process as usually, by pressing the **Print** (F8) button.
